EDUCATION

Toronto Metropolitan University (*Prev. Ryerson University*) *Sep 2021- May 2026* | *Toronto, ON*

Honours BSc. ***Computer Science*** *CO-OP*

- Dean's List (2021-22) | GPA: 3.9
- Relevant Courses: Data Structures, Unix C & C++, Computer Science I-II, Computer Organization I-II, Calculus I, Linear Algebra, Discrete Maths, Ethics.

SKILLS & INTERESTS

- **Programming languages:** Python, C++, C#, Java, JavaScript, Lisp, HTML5, CSS3, SQL (MS SQL, SQLite3)
- **Tools and Framework:** ASP.NET, React, Django, jQuery, REST API's, Ajax, Bash Scripting, Linux, Unix, HTTP, XML, Bootstrap, Git, GitHub, Postman, JSON, Figma, MS office, Vim, Adobe XD, WordPress
- **Soft Skills:** Googling, Effective Time Management, Adaptability, Critical Thinking, Leadership

EXPERIENCE

SCOTIABANK | *Trade Floor Web Developer & Technology Analyst Intern* *May 2022 – Aug 2022* | *Toronto, ON*

- Engineered, deployed, and supported **Full Stack C#** projects, across the fast-paced **trading floor**.
- Built **3 major** applications from scratch - ***Email Communication Archive***, ***File Validator*** & ***JSON To Excel*** operated by divisions across the bank, worldwide
- Developed, optimized, and enhanced web-based systems to improve processing efficiency and run time. Remodeling applications resulted **38% decrease** in processing time and **21.7% hike** in user-base
- Expanded capability and breadth of existing projects by embedding new applications like - ***SSH-fileTransfer***, to securely transfer files to remote UNIX based servers and implemented **API compatibility** for each project etc.
- Modeled and analysed data to eliminate **over 2000** discrepancies from Scotiabank staff migration database by employing **complex SQL queries** and building efficient database tables.
- **Presented** the projects to the COO & GBM executives, during the *GBM-Tech Showcase,* explaining the applicability, necessity and benefits of the tools created
- **Skills:** ASP.NET Framework, C#, Microsoft SQL Server, JavaScript, HTML, CSS, Python3, HTTP, Notion

ENACTUS TMU | *Software Developer* (**tothrive.ca**) *Oct 2021 – Feb 2022* | *Toronto, ON*

- **Developed** the "To Thrive" website, an e-commerce start-up with a vision to bring the creative community together by providing tools that encourage learning and collaboration, and consequently, move our city's culture forward
- Engineered the platform using Webflow, prototyped in Figma and utilized SQLite3 database.
- Worked with **SQL queries** to design effective database structure and keep the website updated with the latest products and customer details.
- **Skills**: Webflow, SQL, Figma, Data Analysis, Bulk Editing

PROJECTS

FilterX *2021*

- Engineered in **C programming** language, involves application of **filters** on photographs.
- Custom algorithm applies filters by taking individual pixels and computing their new RGB values based on their original values, directly extracted out of the file's bytes. ("Blur", "Sepia", "Greyscale" & "mirror")
- Supports .jpeg, .jpg and .bmp files. View the project on GitHub.

ScotiaSimple UI/UX *2022*

- Project focuses on reducing the **digital-divide** by creating a 'lite' app, to enable operations in 2G- 3G networks and providing only fundamental financial operations for a user-friendly experience
- Designed and prototype in Adobe XD and Figma to visualize Scotiabank affiliated app, "ScotiaSimple". View on GitHub.

VOLUNTEERING

IEEE Toronto Metropolitan University | *Software Developer* (**ieeetorontomu.ca**) *Aug 2022 – Present* | *Toronto, ON*

- Building, designing, and maintaining the IEEE TMU website. Creating a new robust, modern UI that boldly represents the goals of the university simultaneously being precise, clean, and capturing for the users
- Developing new functionalities into the site, like **event registration portal**, contact form etc.
- Working on **domain migration** and website rebranding (Prev. IEEE Ryerson University)
- **Organized events** like Industry night etc., attended by more than **100 students** and industry professionals from leading tech companies.
