EDUCATION

Toronto Metropolitan University (*Prev. Ryerson University*) *Toronto, ON*

*Honours BSc **Computer Science** - Co-operative Education* *Sep 2021- May 2026 (5 years)*

- Dean's List (2021-22)

SKILLS & INTERESTS

- **Programming languages:** Python, C++, C#, Java, JavaScript, jQuery, Lisp, HTML5, CSS3, SQL (MS SQL, SQLite3)
- **Tools and Framework:** ASP.NET, React, Django, REST API's, Ajax, Bash Scripting, Linux, Unix, HTTP, Bootstrap, Git, GitHub, Postman, JSON, Figma, MS office, Vim, Adobe XD.
- **Soft Skills:** Interpersonal Skills, Teamwork, Googling, Effective Time Management, Adaptability, Critical Thinking

EXPERIENCE

SCOTIABANK *May 2022 – Aug 2022 | Toronto, ON*

Web Developer and Technology Analyst (Internship)

- Full stack C# developer. Engineered 3 major solo projects – ***Email Communication Archive***, ***File Validator*** & ***JSON To Excel*** operated by divisions across the bank, worldwide
- Responsible for developing, optimizing, and enhancing web tools to improve processing efficiency and run time. Remodeling applications resulted **38%** decrease in processing time and **21%** hike in userbase
- Expanded capability and breath of existing projects by embedding new applications like - ***SSH-fileTransfer***, to securely transfer files to remote Unix based servers and implementing **API compatibility** for each project etc.
- Designed and analysed databases to eliminate discrepancies in data by employing complex queries and efficient table designs. Eliminated over >2000 discrepancies from the Scotiabank staff migration database.
- Presented the projects to the COO & executives of GBM Scotiabank during the *GBM-Tech Showcase,* explaining the applicability, necessity and benefits of the tools created
- Maintained high quality standards for code, documentation, and deliverables to ensure that the tools have a long-term impact and benefits in the coming years

TO Thrive – ENACTUS TMU (*tothrive.ca*) *Oct 2021 – Feb 2022 | Toronto, ON*

Software Developer

- Worked on the TO Thrive website, an e-commerce start-up with a vision to bring the creative community together by providing tools that encourage learning and collaboration, and consequently, move our city's culture forward
- Engineered the platform using Webflow, Figma and SQLite3 database
- Worked with SQLite3 database to design effective database structure, for products and customers

PROJECTS

FilterX *2021*

- Engineered in C programming language, involves application of filters on photographs.
- Custom algorithm applies filter by taking individual pixels and computing their new RGB values based on their original values, directly extracted out of the file's bytes. ("Blur", "Sepia", "Greyscale" & "mirror")
- Supports .jpeg, .jpg and .bmp files. View the project on GitHub

ScotiaSimple UI/UX *2022*

- Project focuses on reducing the digital-divide by creating a 'lite' app, to enable operations in 2G- 3G networks and providing only fundamental financial operations for a user-friendly experience
- Designed and prototype in Adobe XD and Figma to visualized Scotiabank affiliated app, "ScotiaSimple"
- View the project here: https://xd.adobe.com/view/a32492a5-a3d4-4701-9167-6f916bb00376-f677/

VOLUNTEERING

IEEE Toronto Metropolitan University (ieeeryerson.com) *Aug 2022 – Present | Toronto, ON*

Software Developer

- Developing, designing, and maintaining the IEEE TMU student branch website. Creating a new robust, modern UI that boldly represents the goals of the university simultaneously being precise, clean, and capturing for the users
- Engineering new functionalities into the site, like event registration portal etc.
